

Hammer Mill Unit

ANDRITZ FEED & BIOFUEL HAMMER MILL

Design

The Lildal Hammer Mill Unit is designed as a compact unit in a very sturdy construction that meets the rough environment in which it is installed.

The Hammer Mills purpose is to grind the dry substance that remains after defatting in either Press or Centrifuge. The grinded product can be blended directly into for example pet food as a nutritious additive.

The Hammer Mill Unit is delivered complete including Hammer mill, frame, gangway, ladder and bagging devise. Alternative feeding and discharge systems can be delivered according to customer requirements.

Process

Input: Remaining dry substance from Press or Centrifuge

Lildal Hammer Mill Unit

Output: Meal ready for for example pet food

Design Features	Customer Benefits
Compact unit in sturdy execution	Easy to install giving short erection time
Mill housing equipped with bottom hinged sliding doors	Easy access to screens and hammers resulting in easy service and maintenance
The Mill is delivered with build-in stone trap	Stones will be collected before damaging the Mill resulting in increased lifetime
The Mill is equipped with central placed material inlet	Making it possible to reverse the rotation and by that wear the hammers om both sides
Directly coupled motor mounted on base frame	Reliable operation meaning lowest possible down time
