

MOISTURE INDEX METER

Moisture index meter with probe for automatic end-point control

PRODUCT INFO

Electronic device for continuous registration of moisture content in the dry-melted material while it is still in the Dry Melter.

The Moisture Index meter ensures that the dry-melted material will leave the Dry melter with the correct moisture content.

> Signal from probe mounted in Dry Melter Input: to Moisture Index Meter

LILDAL Moisture Index Meter

Output: Moisture content in material

> and signal when pre-set moisture content has been reached
